About
Deltaworx

Deltaworx is a modern web services company based in Maun, Botswana. We specialise in delivering web solutions that empower developers and businesses to grow online. From full featured web applications to custom services such as domains, email, and cloud computing, we help you build an online presence that delivers real results.

We combine expertise in web servers, web design & development, networking and digital infrastructures. Our approach is rooted in simplicity, performance, and long-term reliability, ensuring that every solution we deliver is both efficient and futureproof.

The services we provide include virtual servers, hosting services, automation tools, monitoring services, email, domain registrations and cloud storage. Deltaworx provides a complete ecosystem of digital tools designed to to make building, launching, and scaling anything online simpler and more efficient.

Our mission is to deliver a reliable, accessible, and scalable digital infrastructure that supports the growth and success of businesses and developers in Botswana.

Vision &
Mission

Vision

Our vision is to shape an open, flexible ecosystem where anyone from businesses to solo developers, can access the tools they need to launch and grow online. We aim to be the platform that supports creativity, experimentation, and innovation without the usual technical roadblocks.

Mission

Our mission is to provide a digital infrastructure that is straightforward, robust, and reliable. We want to take the pain out of managing and using online services so our clients can spend more time creating, building, and shipping the ideas that matter.

BUILDING BOTSWANA'S DIGITAL INFRASTRUCTURE

Our
Services

Deltaworx

At Deltaworx, we offer a full range of digital solutions designed to help businesses and developers thrive online. From powerful servers to custom web applications, our services are built for reliability, performance, and ease of use.

Virtual Machines & Servers

We provide fast and reliable Linux and Windows VPS solutions powered by KVM virtualisation. Whether you need a development environment, a production server, or a custom setup, our virtual machines are built for performance, stability, and full control.

Domain Registration & Management

Secure your online identity with easy domain registration and management. We help you find the right domain, register it, keep it protected, and handle all the technical details so you don't have to.

Web Development

We design and build modern websites tailored to your brand and goals. From clean landing pages to full business sites, we create digital experiences that look great and work flawlessly.

Monitoring

We provide tools to help you monitor you websites, servers, applications and network. Receive instant alerts when one of your services goes down. We can monitor HTTP, HTTP with keyword, TCP, Ping and even DNS systems.

Our
Services

Email Services

Professional email that's fast, secure, and built for business communication. We offer modern, dependable email solutions that work across all your devices and help you stay connected without downtime or hassle.

Web Hosting

From simple websites to complex applications, databases, and APIs, our hosting services deliver speed, reliability, and easy management. We give you the tools and performance you need to keep everything running smoothly around the clock.

Cloud Storage & Offsite Backups

Keep your data safe with secure, scalable, offsite cloud storage. Our backup solutions protect your files, databases, and systems from loss while giving you quick access whenever you need it.

Web Applications

For businesses and developers who need something more powerful, we craft custom web applications that solve real problems. Our apps are built with performance, usability, and long-term scalability in mind.

How
We Work

At Deltaworx, we believe that great results come from clear steps, collaboration, and smart use of technology. Here's how we bring your ideas to life:

1

Understanding Your Needs
We start by listening. Whether you're a business or a developer, we take the time to understand your goals, challenges, and the exact requirements of your project.

2

Designing & Building Solutions
Next, we create tailored solutions from cloud infrastructure and websites to web apps and custom systems. Our team focuses on performance, usability, and scalability, ensuring your solution is ready for today and the future.

3

Support & Growth
Finally, we stay by your side. We provide ongoing support, maintenance, and updates so your systems run smoothly and can grow alongside your needs.
